SYNTHETIC METALS VOL. 54, NUMBERS 1–3, MARCH 1, 1993

Contents

Preface xi
C. Taliani (Bologna, Italy)

Sponsors xii

1. Generalities on Synthetic Materials for Electronics and Photonics

Molecular crystals: past and present 1
A. Bree (Vancouver, BC, Canada)

Photoconduction and photorefraction in molecularly doped polymers 9
J. C. Scott, L. Th. Pautmeier and W. E. Moerner (San Jose, CA, USA)

Nonlinear optical properties of sublimed C_{60} thin films 21
F. Kajzar (Gif-Sur-Yvette, France), C. Taliani, R. Zamboni, S. Rossini and R. Danieli (Bologna, Italy)

2. Conjugated Polymers and Oligomers

Electronic excitations and alternation of conjugated polymers 35
Z. G. Soos (Princeton, NJ, USA), S. Ramasesha (Princeton, NJ, USA, and Bangalore, India), D. S. Galvão (Red Bank, NJ, USA, and Campinas, SP, Brazil), R. G. Kepler (Albuquerque, NM, USA) and S. Etemad (Red Bank, NJ, USA)

Anion and cation absorption spectra of conjugated oligomers and polymer 49
M. Deussen and H. Bässler (Marburg, Germany)

Electronic levels ordering in α-sexithienyl 57
R. Zamboni, N. Periasamy, G. Ruani and C. Taliani (Bologna, Italy)

Sample dependence of the magnetic behaviour of polyacetylene. A pulsed ESR comparative study 67
P. Petit, M. Bernard, J.-J. André, D. Reibel and C. Mathis (Strasbourg, France)

3a. Photoexcitations and Fast Phenomena

Ultrafast relaxation in conjugated polymers 75
T. Kobayashi (Tokyo, Japan)

Picosecond transient resonant Raman scattering in partially isomerized polyacetylene films 93
G. Lanzani (Pavia, Italy), L. X. Zheng, R. E. Benner and Z. V. Vardeny (Salt Lake City, UT, USA)

Studies of photoexcitations in conducting polymers by the absorption-detected magnetic resonance technique 99
Z. V. Vardeny and X. Wei (Salt Lake City, UT, USA)

Intrachain photogeneration of polarons in poly(3-methylthiophene) 113
J. Poplawski (Haifa, Israel, and Stuttgart, Germany), E. Ehrenfreund (Haifa, Israel), Z. V. Vardeny (Salt Lake City, UT, USA) and A. J. Epstein (Columbus, OH, USA)

3b. Nonlinear Optical Properties

New advances in molecular engineering for quadratic nonlinear optics 123
I. Ledoux (Bagneux, France)

Quadratic nonlinear optical properties of thermally crosslinkable polymers 139
S. Muller, E. Chastaing, P. Le Barny and P. Robin (Orsay, France) and F. Pellé (Meudon, France)

Electro-optic modulator and second-harmonic generator with nonlinear polymers 147
V. Lemoine, M. Papuchon, J. P. Pocholle, P. Le Barny and P. Robin (Orsay, France)

Recent advances in the synthesis and characterization of nonlinear optical materials: second-order materials 155
L. R. Dalton, L. P. Yu, M. Chen, L. S. Sapochak and C. Xu (Los Angeles, CA, USA)

4. Poster Session: Synthetic Materials for Molecular Electronics

Transport properties of Q1D metals (electron–electron scattering) 163
E. N. Dolgov and D. V. Dmitriev (Moscow, Russian Federation)

Two-phonon Raman scattering in Q1D conducting materials with soft phonon mode 169
E. N. Dolgov and E. Ya. Sherman (Moscow, Russian Federation)

Theoretical investigation on the effects of methyl substitution on the electronic properties of polysilane 173
R. Crespo, M. C. Piqueras, E. Ortí and F. Tomás (Burjassot, Spain)

Electronic properties of poly(pyrrylene vinylenes): a theoretical approach 181
M. C. Piqueras, R. Crespo, E. Ortí and F. Tomás (Burjassot, Spain)

New conductive polymeric systems 187
J. Kubát (Gothenburg, Sweden), R. Kužel, I. Křivka (Prague, Czechoslovakia), P. Bengtsson (Gothenburg, Sweden), J. Prokeš and O. Stefan (Prague, Czech Republic)

Electrochemical behaviour and structural characterization of highly crystalline poly(*p*-phenylene) films obtained by oxidation of benzene in a concentrated sulfuric acid emulsion 195
M. D. Levi, E. Yu. Pisarevskaya, E. B. Molodkina and A. I. Danilov (Moscow, Russian Federation)

Thermal dedoping of poly(3-n-hexylthiophene) films 203
R. H. M. van de Leur, B. de Ruiter and J. Breen (Delft, Netherlands)

Electron spectroscopic studies of models for PPP and PT on p- and n-doping 209
M. G. Ramsey, D. Steinmüller and F. P. Netzer (Graz, Austria)

Stability of thick polypyrrole films electrogenerated on stainless steel 217
T. F. Otero, E. Angulo, C. Santamaria and J. Rodriquez (San Sebastián, Spain)

Polymerization of pyrrole by laser induced photolysis of onium salts 223
W. Behnck and J. Bargon (Bonn, Germany)

Langmuir–Blodgett and vacuum sublimed films of terbium bisphthalocyanine . . . 229
J. Souto, J. A. de Saja (Valladolid, Spain), R. Aroca and M. L. Rodríguez (Windsor, Ont., Canada)

Femtosecond dynamics, photoexcitation and ESR spectra of MX chain solids 237
J. T. Gammel (San Diego, CA, USA), A. Saxena, A. R. Bishop (Los Alamos, NM, USA) and I. Batistić (Zagreb, Croatia)

Light induced conversion of chlorine containing polymers in the presence of pyrrole into conducting patterns 243
R. Baumann (Leipzig, Germany), K. Lennarz and J. Bargon (Bonn, Germany)

5. Ferroelectricity and Ferromagnetism in Organics

Physical properties of achiral mesomorphic ferroelectrics 253
F. Tournilhac (Paris, France), L. M. Blinov (Moscow, Russian Federation), J. Simon (Paris, France), D. B. Subachius and S. V. Yablonsky (Moscow, Russian Federation)

6. Poster Session – Nonlinear Optics: Materials and Devices

Photoluminescence of solid state fullerenes 265
H. J. Byrne, W. K. Maser, W. W. Rühle, A. Mittelbach, W. Hönle, H. G. von Schnering, S. Roth (Stuttgart, Germany) and B. Movaghar (Marburg, Germany)

ODMR spectroscopy of photoexcitations in C_{60} and C_{70} polystyrene glasses 273
X. Wei, Z. V. Vardeny (Salt Lake City, UT, USA), D. Moses, V. I. Srdanov and F. Wudl (Santa Barbara, CA, USA)

Time-resolved luminescence measurements in poly(*p*-phenylenevinylene) 281
I. D. W. Samuel (Cambridge, UK), B. Crystall, G. Rumbles (London, UK), P. L. Burn, A. B. Holmes and R. H. Friend (Cambridge, UK)

Non-linear optical properties modification in some substituted polydiacetylenes due to change of basicity constant of the side groups 289
N. V. Agrinskaya, E. G. Guk and L. A. Remizova (St. Petersburg, Russian Federation)

Non-linear optical properties of conjugated polymers in the SSH model: third harmonic generation 295
Y. I. Dakhnovskii and K. A. Pronin (Moscow, Russian Federation)

Characterization of optical third-order non-linearities by prism coupling and pulse shape analysis on a ps timescale 301
B. J. Offrein, J. B. P. Van Schoot, A. Driessen, H. J. W. M. Hoekstra and Th. J. A. Popma (Enschede, Netherlands)

Surface-plasmon-resonance investigations of Langmuir–Blodgett films of donor–acceptor substituted polyenes: linear optical and electro-optic properties 307
Th. Wagner and S. Roth (Stuttgart, Germany)

Dynamic light modulation in an electrochromic window consisting of polyaniline, tungsten oxide and a solid polymer electrolyte 315
B. P. Jelle, G. Hagen, S. Sunde and R. Ødegård (Trondheim, Norway)

Magneto-optical characterization of excited states in short *trans* chains of partially isomerized polyacetylene 321
X. Wei, Z. V. Vardeny (Salt Lake City, UT, USA), E. Ehrenfreund, D. Moses and Y. Cao (Santa Barbara, CA, USA)

Second optical harmonic generation in the vicinity of insulator-to-metal transition in polyaniline film 327
O. Aktsipetrov, A. Ermushev, A. Petukhov, L. Daikhin, M. Levi and V. Vereta (Moscow, Russian Federation)

Photoexcitations in polyacetylene with controlled conjugation length 331
G. Lanzani (Bologna, Italy, and Salt Lake City, UT, USA), A. Piaggi (Pavia, Italy), R. Tubino (Sassari, Italy), Z. V. Vardeny and G. S. Kanner (Salt Lake City, UT, USA)

7. Processing and Nanotechnologies

Scanning tunnelling microscopy of several alkylated molecular moieties in monolayers on graphite 339
J. P. Rabe, S. Buchholz and L. Askadskaya (Mainz, Germany)

Epitaxial phthalocyanine thin films and phthalocyanine/C_{60} multilayers 351
G. E. Collins, V. S. Williams, L.-K. Chau, K. W. Nebesny, C. England, P. A. Lee, T. Lowe, Q. Fernando and N. R. Armstrong (Tucson, AZ, USA)

Processing of conducting DCNQI radical ion salt films by solid state reactions 363
H. Wachtel (Strasbourg, France)

Photoinduced orientation of azo dyes in polymeric films. Characterization of molecular angular mobility 373
Z. Sekkat and M. Dumont (Orsay, France)

8. Non-Carbon Based Polymers

Photoinduced electron–hole charge separation, intrinsic self-doping and novel device applications of Q1D heterojunction materials: mixed-halide MX solids 385
A. Saxena, X. Z. Huang, A. R. Bishop, L. A. Worl, S. P. Love, B. I. Swanson (Los Alamos, NM, USA) and J. T. Gammel (San Diego, CA, USA)

Exciton kinetics in poly(di-n-hexylsilane) 391
R. G. Kepler (Albuquerque, NM, USA), Z. G. Soos (Princeton, NJ, USA) and J. R. G. Thorne (Philadelphia, PA, USA)

9. Devices

Conjugated polymer electroluminescence 401
D. D. C. Bradley (Cambridge, UK)

Trap-free charge transport in polymers, with tunable mobilities 417
M. Stolka and M. A. Abkowitz (Webster, NY, USA)

Electrical and optical characterization of poly(phenylene-vinylene) light emitting diodes 427
S. Karg, W. Riess, V. Dyakonov and M. Schwoerer (Bayreuth, Germany)

All-organic field-effect transistors made of π-conjugated oligomers and polymeric insulators 435
G. Horowitz, F. Deloffre, F. Garnier, R. Hajlaoui, M. Hmyene and A. Yassar (Thiais, France)

Electrical characteristics of field-effect transistors formed with ordered α-sexithienyl 447
P. Ostoja, S. Guerri, S. Rossini, M. Servidori, C. Taliani and R. Zamboni (Bologna, Italy)

The application of polypyrrole as counterelectrode in electrolytic capacitors 453
L. H. M. Krings, E. E. Havinga, J. J. T. M. Donkers and F. T. A. Vork (Eindhoven, Netherlands)
